

ConAP

MEP – Consulting Engineers

Company Profile

(02 /2026)

Company Introduction

ConAP, is a firm which specializes in Consulting, Design and Supervision of MEP (Mechanical, Electrical, and Plumbing) Engineering.

The company's scope is to deliver sustainable, innovative and high-quality level of engineering solutions for buildings and infrastructure projects regardless of building size and type, installation, materials and construction method.

ConAP consists of highly experienced engineers with substantial scientific knowledge, engineering know-how and practicing experience.

Emphasizing on the comprehensive approach of any project from the initial conceptual phase through the final detailed designs, on to the construction and ultimately the successful delivery and commissioning of the installation.

ConAP collaborates and utilizes the experience and abilities of premier companies in servicing infrastructure, residential and commercial construction projects of all sizes and sector requirements to ensure that the needs of the client will be fully serviced.

Company CEO

Psaroudakis Andreas, Electrical Engineer.

Graduated from University of Patras in 1994

Electrical Engineering and computer technology engineering department.

He was a founder member in

- HTME (1996 - 2009) (MEP Design and Consulting),
- DELTA ALPHA DELTA (2004 - 2009) (Construction, Project Management)
- A & D DESIGN.S (2004 - 2010) (MEP Design, Project Management)

In 2010 he founded ConAP.

His skills include electrical and mechanical design, project management procurement, quality control, commercial issues, subcontracting.

- Quantity Surveying

Success Criteria

- Accumulated experience in various fields and types of projects in commercial and residential and industrial fields.
- We have acquired communication skills to accommodate every customer desire, from concept to facture.
- The ability to set priorities on the field; we are firm but allow flexibility and strive to achieve the promised delivery times.
- We are next to the client to suggest cost efficient solutions, which were applied successfully in past projects.
- We cooperate with skilled personnel with adept abilities to materialize our requirements.
- We remain next to the client even after completion of the project, because experience has shown that the actual integration of the building with its inhabitants is affected long time after the last technician has completed the final tasks.
